Conditions:

SECTION 4: FIRST AID MEASURES

Eye Contact:

Immediately flush eyes with plenty of water for at least 15 to 20 minutes. Ensure adequate flushing of the eyes by separating the eyelids with fingers. Get immediate medical attention.

Skin Contact:

Immediately wash skin with soap and plenty of water. Get medical attention if irritation develops or persists.

Inhalation:

If inhaled, remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention

Ingestion:

If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

Fire Fighting Instructions:

Evacuate area of unprotected personnel. Use cold water spray to cool fire exposed containers to minimize risk of rupture. Do not enter confined fire space without full protective gear. If possible, contain fire run-off water.

Extinguishing Media:

Use carbon dioxide (CO2) or dry chemical when fighting fires involving this material.

Protective Equipment:

As in any fire, wear Self-Contained Breathing Apparatus (SCBA), MSHA/NIOSH (approved or equivalent) and full

protective gear.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal Precautions:

Evacuate area and keep unnecessary and unprotected personnel from entering the spill area.

Spill Cleanup Measures:

Shovel or sweep up for re-use or disposal. Avoid creating dusty conditions. Provide ventilation. Clean up spills

immediately observing precautions in the protective equipment section.

SECTION 7: HANDLING and STORAGE

Handling:

Use with adequate ventilation. Avoid breathing dust or particulates.

Storage:

Store in a cool, dry, well ventilated area away from sources of heat and incompatible materials. Keep container

tightly closed when not in use.

Hygiene Practices:

Wash thoroughly after handling.

SECTION 8: EXPOSURE CONTROLS, PERSONAL PROTECTION - EXPOSURE GUIDELINES

Engineering Controls:

Use appropriate engineering control such as process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Good general ventilation should be sufficient to control airborne levels. Where such systems are not effective wear suitable personal protective equipment, which performs satisfactorily and meets OSHA or other recognized standards. Consult with local procedures for selection, training, inspection and maintenance of the personal protective equipment.

Eye/Face Protection:

Wear appropriate protective glasses or splash goggles as described by 29 CFR 1910.133, OSHA eye and face protection regulation, or the European standard EN 166.

Skin Protection Description:

Wear appropriate protective gloves and other protective apparel to prevent skin contact. Consult manufacturer's data for permeability data.

Respiratory Protection:

 $A \ NIOSH \ approved \ air-purifying \ respirator \ with \ an \ organic \ vapor \ cartridge \ or \ can is ter \ may \ be \ permissible \ under \ an \ organic \ vapor \ cartridge \ or \ can is ter \ may \ be \ permissible \ under \ an \ organic \ vapor \ cartridge \ or \ can is ter \ may \ be \ permissible \ under \ organic \ vapor \ cartridge \ or \ can is ter \ may \ be \ permissible \ under \ organic \ vapor \ cartridge \ or \ can is ter \ may \ be \ permissible \ under \ organic \ vapor \ cartridge \ or \ can is ter \ may \ be \ permissible \ under \ organic \ vapor \ cartridge \ or \ can is ter \ may \ be \ permissible \ under \ organic \ org$ certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.
